

# MOKUHANGA INNOVATION LAB (MI-LAB)

## Attachment No.1 Description of MI-LAB Echizen Studio

Name of the facility: MI-LAB Echizen Studio

Address: 27-8 Awatabe Town, Echizen City, Fukui Prefecture (after January 1, 2024)

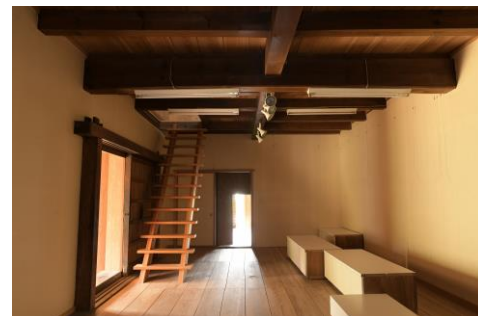

We will use a traditional Japanese style two-floor residence house as a studio and office. Please use it after understanding that there are some peculiarities due to the nature of the building.

### 1. Studio

There is a large shared studio with workbenches. If the room isn't large enough for all the participants, the exhibition space will be also used as an additional studio.

The exhibition space used to be kura (traditional Japanese warehouses), where the exhibitions of AIR participants and special exhibitions of woodblock prints will be held.

## 2. Private rooms

Each artist will be provided with one room which is in the traditional Japanese style. The partitions between the rooms are “fusuma” (paper sliding doors in wooden frames), which are fixed so that they cannot be opened. There are also “ranma” (small open windows for ventilation with decorative carvings) over the doors. Though the privacy level is not as high as usual hotel rooms, we have decided to preserve them so as not to spoil the beauty of the house. Please understand this point before using.

Each room is equipped with:

- a bed;
- a ceiling light and a table light;
- an air conditioner;
- a PC table and a chair;
- hangers and shelves.

## 3. Dining room

There is a large shared dining room with kitchen facilities. Participants can cook and eat here. It can also be used as a living room during breaks.

## 4. Bath and toilet

There are one both and toile on each floor. One will be used for men and another for women.

## 5. Others

There is an elevator for common use. There is a Japanese garden with pine trees. The architecture is very beautiful: there is an atrium and pillars can be seen here and there. We organize catering services for lunch and dinner and you may order meal boxes.
